

Client	Taunton Deane
Date	2007
Number of units	1
Location	High Street

Town Centre Manager Lucy Ball explained:

"We had to take action. In addition to late night drinking, the existing public toilets are closed at night because they were being used for sleeping or drugs. "Working with the police and local pub owners, we concluded that the UriLift, which is being installed right in the town centre where it is most needed, offered the best solution. Fortunately, local surveys indicated that this was also the best location for access to essential utilities."
